

flexx2 Development Kit

The pmd 3D Sensing Family gives you the flexibility to easily add 3D vision to your product. It works out of the box and has all the tools and software you`ll need to start.

Countless exciting and industry-changing projects are built upon the flexibility and reliability of these 3D Development Kits and make use of the high-quality depth data from Infineon's IRS2381C REAL3™ Time-of-Flight Image Sensor. The flexx2 comes with a special software development kit (SDK) "Royale", and will be code compatible with the previous pico flexx. Royale supports popular programming extensions including Matlab, OpenCV, and ROS 1+2.
